MENTOR® CPG™ Gel Breast Implants

10 YEARS
THAT SHAPED BREAST
AESTHETICS

A ten year multicentre FDA Core Study.¹
A significant milestone in the design and performance of the MENTOR® CPG™ Gel Breast Implants

Based on a decade of research into the safety and efficacy of breast implants, our Mentor Core Study¹ provides evidence to support the UNSURPASSED PERFORMANCE*² of MENTOR® CPG™ Gel Breast Implants. This clinical data reveals MENTOR® CPG™ Gel Breast Implants have the lowest reported incidence of key complications in primary augmentation at 10 years.*²

Furthermore, the MENTOR® CPG™ Gel Breast Implant offers you TEXTURE YOU CAN TRUST, supported by long-term clinical data,³ and the MOST PROJECTING SHAPED IMPLANT on the market.†

This brochure summarises the latest findings on these three areas.

For further information about MENTOR® CPG™ Gel Breast Implants or any other MENTOR® Products, talk to your Mentor Sales Representative today or visit mentorwwllc.eu.

* Not a head to head study. Based on the comparison of key complication rates reported in the 10 year Core Studies for MemoryShape®, CPG™ Gel Breast Implants, NATRELLE™ 410 TruForm™ 3 Gel Breast Implants, NATRELLE™ Round TruForm™ 1 Gel Breast Implants, and MemoryGel® Breast Implants
MENTOR® CPG™ Gel Breast Implants with SILTEX™ Texture have 0% reported incidence of double capsule and the lowest reported incidence of rotation and capsular contracture in the Core study at 10 years.

By manufacturing an implant with our unique SILTEX™ Imprinted Texture, we have created a surface substantially free of pores and interstices which can contribute to a reduction in key complications of breast augmentation.

Our SILTEX™ Texture provides consistent coefficient of friction throughout the device to minimise implant rotation.

MENTOR® CPG™ Gel Breast Implants are proven to have a low risk of capsular contracture and rotation in primary augmentation patients at 10 years.

Proven results that you can trust:

**LOWEST**

Reported incidence of the following complications at 10 years

- 3.6% Capsular contracture in primary augmentation

**LOW**

Complication risk in over 9000 SILTEX™ Texture Implants

- 0% Reported double capsule

**NO**

Silicone globules left behind

- 0 out of 5

No (0) particles suspected to be silicone globules were found in the capsular tissue of 5 patients implanted with SILTEX™ Texture devices

MOST PROJECTION SHAPED IMPLANT

Projection without compromising the feel

With a uniquely formulated cohesive gel that holds together uniformly, the MENTOR® CPG™ Gel Breast Implant offers maximum projection when needed, whilst giving your patients a natural shape and feel.

Natural shape and projection that lasts:

COMPARISON CHARTS: Shaped Gel vs MENTOR® CPG™ Gel Breast Implants Projection Comparison – Shaped Implants 13 – 13.5 cm diameter

Give your patients maximum projection with a soft, natural feel. Talk to your Mentor Sales Representative today or visit mentorwwllc.eu for more information.

**UNIVERSAL PERFORMANCE**

**Reliable implants continuously delivering world class clinical results**

Based on clinical study results for primary augmentation patients, MENTOR® CPG™ Gel Breast Implants have the LOWEST REPORTED INCIDENCE OF KEY COMPLICATIONS IN PRIMARY BREAST AUGMENTATION AT 10 YEARS.

Each MENTOR® CPG™ Gel Breast Implant undergoes a stringent quality inspection and rigorous testing to ensure quality, performance and shell integrity.

The outcomes of the Core Study speak for themselves, with beautiful, long-lasting results and high patient satisfaction.

**Results that instil confidence in your patients:**

10 YEARS OF COMMITMENT TO EXCELLENCE

This 10 year data demonstrates our passion to deliver safe products that offer high quality, reliable and state-of-the-art design to enhance breast aesthetic procedures. We are determined to continue to provide objective, clinical information about breast implant safety.

To our Mentor customers and patients, we pledge our commitment to excellence.

Our Lifetime Product Replacement Policy is our promise to you

The confidence we have in our products speaks for itself. That’s why every MENTOR® CPG™ Gel Breast Implant comes with a FREE Lifetime Product Replacement Policy with automatic patient enrollment.

The Lifetime Product Replacement Policy assures that all our implants are made to the highest level of quality and service.

For further information, talk to your Mentor Sales Representative or visit mentorwwllc.eu.

Important Safety Information

MENTOR® MemoryGel™ Breast Implants are indicated for breast augmentation, in women who are at least 18 years old, or for breast reconstruction. Breast implant surgery should not be performed in those women with active infection anywhere in their body, those with existing cancer or pre-cancer of their breast(s), those who have not received adequate treatment for these conditions or those who are pregnant or nursing.

There are risks associated with breast implant surgery. Breast implants are not lifetime devices and breast implantation is not necessarily a one-time surgery. The most common complications with MENTOR® MemoryGel™ Breast Implants include re-operation, implant removal, capsular contracture, asymmetry, and breast pain. A lower risk of complication is implant rupture, which is most often silent. The health consequences of a ruptured silicone gel-filled breast implant have not been fully established. Screenings such as mammography, MRI, or ultrasound are recommended after initial implant surgery to assist in detecting implant rupture.

Your patient needs to be informed and understand the risks and benefits of breast implants, and she should be provided with an opportunity to consult with you prior to deciding on surgery.

For detailed indications, contraindications, warnings and precautions associated with the use of all MENTOR® Implantable Devices, please refer to the Product Insert Data Sheet provided with each product, or review the Important Safety Information provided at www.mentorwwllc.eu.
